

## **ACKNOWLEDGEMENT**

If words are considered as symbols of approval and tokens of acknowledgement, then let words play the heralding role of expressing my gratitude.

First of all I would like to thank God almighty for bestowing us with wisdom, courage and perseverance which had helped us to complete this project AI based integrated health club management system. This project has been a reality as a result of the help given by a large number of personalities.

I am extremely thankful to Rev.Dr. Tomy Joseph Padinjareveetil, Director and Prof. Mohanlal P , Principal, Lourdes Matha College of Science And Technology Kuttichal for providing me with the best facilities and atmosphere which was necessary for the successful completion of this project.

I would like to remember with gratitude Prof. Selma Joseph, Head Of Department, Department of Computer Applications, Lourdes Matha College of Science And Technology Kuttichal, for the encouragement and guidance rendered.

I express our profound and sincere gratitude to Prof. Neethu Mohan, (Project Coordinator) Department of Computer Applications, Lourdes Matha College of Science And Technology Kuttichal for the immense support and guidance provided.

I express my sincere thanks to Prof.Bismi S Charleys, (Internal Supervisor) Department of Computer Applications, Lourdes Matha College of Science And Technology Kuttichal for his valuable guidance, support and advices that aided in the successful completion of my project. Finally, I wish to express my sincere gratitude to all our friends, who directly or indirectly contributed in this venture.

## **ABSTRACT**

This is a cloud based Integrated software for complete Health Club management with features like Membership Management, Marketing Management, Reservations Management, Automatic Attendance Tracking, Event Management, virtual trainer and helpdesk, Class Management and auto class scheduling. Pre-trained chatbot which can handle all day today activities with clients and will guide users through different workouts and also provide a suitable diet chart to be followed as per the selected fitness goal. The chatbot will also present different exercise routines based on the intensity level the user chooses and is comfortable with. All general enquiries related to all branches is also possible through this system Can book and enquire about available slots for special activities like pool,yoga etc. Reception desk will have a club kiosk capable of handling club membership management and registration. A great solution for clubs with 24/7 access controls for client acquisition at any time with the help of virtual assistant. Automatic Attendance Tracking system works with both attendance management using face recognition and biometric system. This system marks attendance from multiple locations with a cloud stored database. This Business Intelligence module is powered by machine learning algorithms. This will deliver fresh insights on how many gym members may be expected to leave a Health club at any given time. This data is based on club member actions taken, their preferences, and how similar members behave. Automated Notification system to staff and clients with this automation module, admin can communicate special offers, class schedules, payment confirmations, contract due dates, and can automate the sign-up process via the client portal for more member convenience. Automated Recurring Payments revenue streams are automatic and reliable with recurring payments set up for all fitness membership dues. Staff Management manage the staff operations in the health club with ease. Dynamic employee scheduling, commission programs, and notifications for trainers and class instructors to help keep employees organized.
